

Supplier Self-Service Portal

A simple status brief

Owner: Syed Faez Hasan (Seller Experience)

Date: 8 June 2026

In one line: a single place where sellers can see and update their own profile and bank account details — instantly, 24/7 — instead of raising a support ticket.

1. What are we building?

A self-service tool inside the Fleek seller app, with two simple tabs:

- **Profile** — shop name, bio, profile picture, contact details, zone & account status.
- **Account & Payments** — current bank account, full history, and bank update requests.

Sellers can update what they own. Seller Support reviews bank changes. Approved bank details flow into Fleek's Financial Portal.

2. Why does it matter?

- Sellers wait **5 minutes to 24+ hours** for the same task today, depending on when they ask.
- There is **no visible history** — sellers and support both ask "which bank account is active right now?"
- Bank / KYC is the **#1 support theme** — **297 → 334 → 281 tickets** in Mar / Apr / May '26 — almost all of which are self-serviceable from data we already hold.
- Old process: **Google Form + email chain** for bank updates, with no status visibility for the seller.

Top ticket drivers (last 3 months) — and what this tool does about them:

Driver (L3 reason)	Mar	Apr	May	3-mo trend	Addressed by
Bank account details update	119	133	146	↑ +23%	Account & Payments tab (live)
Login credentials required	63	66	20	↓ -70% Apr→May ✔	Already mitigated
How to change profile picture	19	14	31	↑ rising again	Profile tab (live)
Seller KYC information	8	22	24	↑ +200% ⚠	Bank history + admin audit log
Profile picture update	36	58	32	mixed	Profile tab + AI moderation (live)
Password update request	28	14	15	↓	Phase 2 — password self-serve

Driver (L3 reason)	Mar	Apr	May	3-mo trend	Addressed by
Shop name update	8	9	4	↓	Profile tab (live)
How to change shop name	6	8	3	↓	Profile tab (live)
Email address update	2	5	6	↑ slight	Profile tab — needs OTP (gap)
Bio update	3	1	0	✅ resolved	Profile tab (live)
Phone number update	2	4	0	✅ resolved	Profile tab — needs OTP (gap)
Unable to create account	3	0	0	✅ resolved	Out of scope
Total Bank / KYC theme	297	334	281	mixed	

Source: CX ticketing L2 → L3 breakdown, Mar–May 2026. Once the write-path gaps in §5 are closed, the portal directly addresses categories representing **~75–80% of the theme volume**.

3. What is already done?

Profile tab (live)

- Real shop name, bio, profile picture, email, phone, zone and status pulled live from Fleek's database.
- Inline edit for shop name, bio and profile picture.
- **AI moderation** on profile pictures — blocks images containing phone numbers, emails, or external store links (disintermediation defense).
- Mobile / Desktop view toggle.

Account & Payments tab (live)

- Current bank account card with default badge.
- Full **history of every bank account** the seller has ever used.
- **View details** on each row — address, account type, currency, bank code.
- Active / Inactive labels, added & deactivated dates, total active duration.
- Country-aware bank update form with field validation and document upload.
- Status badges: Submitted → Under Review → Approved / Rejected.

Internal admin tool (live)

- Seller Support queue, one-click Approve / Reject with reason, signed-URL access to documents, full audit log.

4. Current vs. desired state

Feature	Current	Desired
Profile		
View profile data	Available	Available
Edit shop name, bio & profile picture	Saves on our side only	Auto-syncs to Fleek vendor record
Edit email / phone (with OTP)	Not yet	Available
Bank account		
Bank Account History	Available	Available
View Bank Details	Available	Available
Address Details	Available	Available
Active / Inactive Tracking	Partial	Complete
Activation & Deactivation Dates	Available	Available
Default Payment Account Visibility	Available	Available
Approved bank → Fleek Financial Portal	Manual re-entry	Auto-push

Read-side is essentially done. The one remaining gap is the **write path** back to Fleek's canonical Vendor and Financial Portal systems.

5. What we need from Engineering

1. **Platform API access** — endpoint URL + service auth token so the portal can push edits back.
2. **Vendor update contract** — confirmed mutation for shop name, bio & picture changes.
3. **Bank account push** — mutation that lands approved submissions in the Fleek Financial Portal automatically.
4. **OTP service** for verifying email & phone changes.
5. **PII retention policy** — what we may safely store of account numbers and supporting documents.

Our side is already scaffolded — once items 1–3 are provided, full wiring is **under a day** of work.

6. How it works

Profile update

Bank account update

7. Screenshots from the live tool

[Profile tab]

[Profile picture moderation]

Profile tab — shop name, bio, picture, contact & status

Picture moderation — AI rejects phone / email / external URLs

[Mobile / Desktop toggle]

[Bank account history]

Mobile / Desktop toggle — same portal, two layouts

Bank Account History — all accounts, default badge

[Bank account details]

[Approval journey]

Bank Account Details — address, dates, full timeline

Approval journey — Submitted → Under Review → Approved
